VI VISION & INNOVATION

Omnichannel Solution

Say goodbye to siloed systems and hello to a **Unified Customer Experience**

Digital Channels

Our Digital Channels integrate mobile apps, websites, and social media platforms to provide seamless 24/7 customer engagement, enabling instant access to products, services, and support from any device.

Smart in-Branch Experience

The Smart in-Branch Experience blends interactive tech with personalized service, transforming branches into modern hubs for memorable customer interactions

Intelligent Contact/call Centers

AI-powered support across multiple channels, delivering consistent service quality through voice, chat, and email interactions.

Seamless Integration

Enhanced customer experience through unified channels, powered by data-driven personalization and modern operational efficiency.

Mobile App Development

Custom Solutions
Tailored mobile apps for unique business requirements.

Cross-Platform Development
Seamless functionality on iOS and Android.

User-Centric Design
Intuitive interfaces for improved user experiences.

Integration
Compatibility with ERP systems like Odoo.

Web Development Solutions

VISION & INNOVATION

Modern, responsive, and scalable websites tailored to your business goals.

UI/UX Design
Intuitive and user-friendly interfaces

Front-end Development
Responsive and modern designs

Web Applications
Custom business-driven solutions

Back-end Development
Secure and scalable architecture

SEO Optimization
Boost visibility and traffic

Analytics
Data-driven insights and tracking

VANDI's Products & Services

Data Analysis & Visualization

Predictive Analytics

Forecast trends, identify opportunities.

Customer Segmentation

Analyze user data target offerings.

Regulatory Reporting

Dashboards for compliance requirements.

Omnichannel Dashboard

Monitor KPIs and customer behavior.

Software Quality Testing Services

A comprehensive approach to ensure software quality through various testing methodologies:

Functional Testing — 1

- Unit Testing: Individual code units
- Integration Testing: Component interactions
- System Testing: Complete system functionality
- Acceptance Testing: User requirements verification

2 — Non-Functional Testing

- Performance & Load Testing
- Security Testing: Vulnerability assessment
- Usability Testing: User experience evaluation
- Compatibility Testing: Cross-platform verification

Verification & Validation — 3

- Regression Testing: Impact analysis of changes
- Smoke & Sanity Testing: Basic functionality checks
- Alpha & Beta Testing: Internal and external user validation

VI
VISION & INNOVATION

Trusted Partners
